Pressure Vest

PRU-73/P Pressure Vest

The PRU-73/P Pressure Vest provides **breathing protection** and assistance at **high altitudes** both in the cockpit and following ejection, during G maneuvers, and in rapid decompression events. The Pressure Vest is composed of a **moisture-wicking, flame-retardant material.** The bladder is composed of a moisture vapor permeable (MVP) material for **comfort** and decreased **thermal burden.**

This novel vest provides the **same altitude protection** as legacy equipment with **reduced vest coverage** on the torso for a **lightweight, minimal** design.

The Pressure Vest **integrates** with legacy equipment.

The PRU-73/Pressure Vest is **currently fielded** to United States Air Force F-22 pilots.

The PRU 73/P **integrates with** the **CWU-111/P** Undergarment Outfit, Extreme Cold Weather (Environmental Protection Layer); **CWU-112/P** Undergarment Outfit, Extreme Cold Weather (Thermal Undergarment); **PRU-74/P** Flight Suit (Coverall); **PRU-76/P** Undergarment, Chemical, Biological, Radiological Layer (CBRL); **PRU-72/P** Survival Vest; and the **PRU-75/P** Life Preserver Unit (LPU).
