# Survival Vest and Components

## PRU-72/P Survival Vest

The PRU-72/P Survival Vest provides **carriage** and **stowage** for essential survival gear and evasion items. The vest is a **modular, scalable, adjustable, load carriage system** with a suite of 15 components available separately.

This novel **configurable** design uses the MOLLE attachment system for **optimal tailorability.** It also contains two large internal pockets for storage. The shorter torso length provides **improved weight distribution** and **less interference** in the seated position. The Survival Vest can be worn **under** or **over** ejection seat torso harnesses.

The rugged, lightweight Survival Vest is constructed of **high-strength, flame-retardant, abrasion-resistant** material, with breathable mesh in key areas.

The PRU-72/P Survival Vest is **currently fielded** to United States Air Force F-22 pilots.

The PRU 72/P **integrates with** the **CWU-111/P** Undergarment Outfit, Extreme Cold Weather (Environmental Protection Layer); **CWU-112/P** Undergarment Outfit, Extreme Cold Weather (Thermal Undergarment); **PRU-74/P** Flight Suit (Coverall); **PRU-76/P** Undergarment, Chemical, Biological, Radiological Layer (CBRL); **PRU-73/P** Pressure Vest; and the **PRU-75/P** Life Preserver Unit (LPU).
